

# Unqork JumpStart Onboarding Package

## AT A GLANCE

The **Unqork JumpStart Onboarding Package** is a 12-week comprehensive program to assist your team in getting started with Unqork.

Through a series of guided sessions and interactive workshops your team will **learn to build applications the Unqork way: 3x faster and with 600x fewer bugs.**

With JumpStart, your team will learn to efficiently identify no-code use cases, rapidly build custom no-code software, and begin realizing the business value of Unqork.

## KEY BENEFITS

- ✓ **Maximize your ROI** by training your no-code team so that you quickly realize the business value of Unqork
- ✓ **Leverage Unqork expertise** to establish best practices and build software with the highest levels of quality and security
- ✓ **Scale your no-code function** by training your team to identify the use-cases that are best suited for no-code solutions

**For JumpStart pricing and to discuss how the program can be tailored to your organization's specific use cases, contact your Unqork representative.**

We require that all new customers participate in the JumpStart program to enhance their experience building their first application(s) on Unqork.

## What You Can Expect from JumpStart

In the hands-on sessions of the JumpStart program, your team will learn the ins and outs of Unqork side-by-side with our customer success and professional services teams.

Our customer success team will manage your experience in the program and will customize your sessions to your specific use case and digitization initiatives, and our professional services team will guide your JumpStart sessions, and review your configuration.

The JumpStart program is divided into four sections. Office hours are held throughout all of the sections, and a small subset of the topics covered each section are included below.

### SECTION 1: KICK-OFF (DAYS 1-10)

During your JumpStart Kick-Off, you'll participate in the JumpStart Bootcamp and you'll be invited to join the Unqork Academy.

We'll also host an architecture brainstorming session in preparation of building your first application(s).

### SECTION 2: REQUIREMENTS GATHERING (DAYS 11-30)

In this section, we'll facilitate your requirements gathering, review your user personas, wireframes, and workflows, as well as recommending patterns for ease of configuration & application performance.

### SECTION 3: CONFIGURATION (DAYS 31-60)

In the Configuration section, we'll help your team implement your front-end styling, and we'll review your: RBAC, data model & schemas, integrations, and application security.

We'll also guide your team in setting up batch file or SFTP integrations and configure your SSO/SAML.

### SECTION 4: UAT & LAUNCH (DAYS 61-90)

In the UAT and Launch section, we'll review and troubleshoot your configuration, suggest optimized configuration patterns and recommend data management best practices (e.g., caching and browser storage).

As you can see, the JumpStart program is packed full of sessions that will benefit every role in your Unqork Center of Excellence, from your Environment Administrator and Solutions Architect, to your Application Specialist and Security Engineer.

# JumpStart Onboarding with Unqork

Guided sessions and interactive workshops across every phase of the SDLC

## About Unqork

Unqork is the industry pioneer no-code enterprise application platform that helps large companies build, deploy, and manage complex applications without writing a single line of code. Organizations like Goldman Sachs, Liberty Mutual, the Cities of New York and Washington, DC and Maimonides Medical Center are using Unqork's drag-and-drop interface to build enterprise applications faster, with higher quality, and lower costs than conventional approaches.
